UNIVERSITÄT ZU LÜBECK

Module Guide for the Study Path

Bachelor MLS 2016

Version from 1. October 2024

1st semester

2nd semester

3rd and 4th semester

3rd semester

4th semester

5th semester

6th semester

Arbitrary semester

LS1000-KP08, LS1000-MLS - Biology 1 (Bio1KP08)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	8

Course of study, specific field and term:

- Bachelor CLS 2023 (compulsory), life sciences, 1st semester
- Bachelor Nutritional Medicine 2024 (compulsory), life sciences, 1st semester
- Bachelor Molecular Life Science 2024 (compulsory), life sciences, 1st semester
- Bachelor MLS 2018 (compulsory), life sciences, 1st semester
- Bachelor Nutritional Medicine 2018 (compulsory), life sciences, 1st semester
- Bachelor CLS 2016 (compulsory), life sciences, 1st semester
- Bachelor Nutritional Medicine 2016 (compulsory), life sciences, 1st semester
- Bachelor MLS 2016 (compulsory), life sciences, 1st semester

Classes and lectures:

- Basic Biology (lecture, 4 SWS)
- Basic Biology (practical course, 2 SWS)

Workload:

- 150 Hours private studies
- 90 Hours in-classroom work

Contents of teaching:

- Lectures:
- Introduction
- Structure and functions of the prokaryotic cell
- Structure of the eukaryotic cells
- Selected topics of multicellular organisation
- Storage, duplication and realization of the hereditary information
- Cell cycle
- Fertilization and development
- Formal and molecular genetics, evolution
- Practical course:
- Individual testHandling of light microscopes
- Structure of prokaryotic cells
- Structure of cells from metazoan
- Human chromosomes
- Cell cycle and mitosis
- Genetics
- Bacteria

Qualification-goals/Competencies:

- Improvement of basic knowledge for life-science education
- Ability to understand, reproduce and use in the further studies basics of all areas listed in
- Basal practical skills in light microscopy

Grading through:

- written exam (test achievement)

Responsible for this module:

- Prof. Dr. rer. nat. Enno Hartmann

Teacher:

- Institute for Biology

- Prof. Dr. rer. nat. Enno Hartmann
- Prof. Dr. rer nat. Rainer Duden
- PD Dr. rer. nat. Kai-Uwe Kalies
- PD Dr. rer. nat. Bärbel Kunze

Literature:

- : Cambell Biology

Language:

- offered only in German

Notes:

Admission requirements for taking the module:
- None

Admission requirements for participation in module examination(s):
- Successful participation in practical course

Module exam(s):
- LS1000-L1: Biology 1, written exam, 90 min, 100% of module grade

See also HM1-10050.

LS1100-KP10, LS1100-MLS - General Chemistry (ACKP10)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each winter semester	10	40

Course of study, specific field and term:

- Bachelor Nutritional Medicine 2024 (compulsory), Chemistry, 1st semester
- Bachelor Molecular Life Science 2024 (compulsory), Chemistry, 1st semester
- Bachelor MLS 2018 (compulsory), life sciences, 1st semester
- Bachelor Nutritional Medicine 2018 (compulsory), life sciences, 1st semester
- Bachelor MLS 2016 (compulsory), life sciences, 1st semester
- Bachelor Nutritional Medicine 2016 (compulsory), life sciences, 1st semester

Classes and lectures:

- General Chemistry (lecture, 3 SWS)
- General Chemistry (exercise, 1 SWS)
- General Chemistry (practical course, 4 SWS)

Workload:

- 180 Hours private studies
- 120 Hours in-classroom work

Contents of teaching:

- Lectures: Roles of Environmental and Health-Saftey and the guidelines of the GSP
- The structure of atoms and the periodic table of the elements
- Chemical bonds, molecules and Ions
- Reaction equations and stoichiometry
- The threedimensional structure of molecules: From the VSEPR model to molecular orbitals
- Special properties of water
- Chemical equilibrium
- Acids and bases
- Redox reactions and electrochemistry
- Complexes and metal-ligand bonds
- Interactions between mater and radiation - Molecular spectroscopy
- Thermodynamics
- Chemical kinetics
- Exercises:
- Students discuss problems covering all topics of the lectures on the black board
- Practical course:
- Students work self-actingly and independently with respect to the environment and occupational health and safety in the handling of hazardous materials (according to the Globally Harmonized System of Classification and Labeling of Chemicals (GHS) and with regard to the rules of GSP of the University of Lübeck and of the DFG-guidelines).Topics:
- Basics principles and laboratory techniques
- Salts and their aqueous solutions
- Acids, bases and buffer
- Redox reactions
- Katalysis, metal-ligand complexes and chemical equilibrium
- Laboratory test

Qualification-goals/Competencies:

- Students have a fundamental knowledge of general and inorganic chemistry, as well as a primary knowledge of the properties of inorganic materials.
- They understand the fundamental concepts of general and inorganic chemistry and can apply them to reactions and general scientific topics.
- Because of their self-acting and independent work in the practical course they have fundamental practical skills to perform simple experiments and analyzes in the chemical laboratory, with respect to the environment and occupational health and safety in the handling of hazardous materials (according to the Globally Harmonized System of Classification and Labeling of Chemicals (GHS) and with regard to the rules of Good Scientific Practice (GSP) of the University of Lübeck and of the DFG-guidelines).
- Students are able to perform chemical calculations from all subareas of the course.
- They are able to observe, document, interpret and present results from basic chemical experiments and analyzes (laboratory notebook, written protocol , oral examination) with regard to the roles of GSP of the University of Lübeck and of the DFG-guidelines. This includes the self-dependent handling of scientific topics with regard to their chemical backgrounds.
- They have team competence in laboratory work as well as in writing and communication.

- Students can transfer the acquired knowledge to problems of other branches in chemistry and related sciences and are thus able to participate in continuative courses.

Grading through:

- written exam

Is requisite for:

- Organic Chemistry (LS1601-KP12)
- Organic Chemistry (LS1600-KP10, LS1600-MLS)

Responsible for this module:

- PD Dr. phil. nat. Thomas Weimar

Teacher:

- Institute of Chemistry and Metabolomics

- PD Dr. phil. nat. Thomas Weimar
- Prof. Dr. rer. nat. Karsten Seeger
- Dr. rer. nat. Thorsten Biet

Literature:

- Brown et.al.: Chemie studieren kompakt - Pearson Studium
- Binnewies et al.: Allgemeine und Anorganische Chemie - Spektrum Verlag

Language:

- offered only in German

Notes:

Prerequisites for the modul:
- nothing

Prerequisites for admission to the written examination:
- succesful participation in the practical course with all tests.

Modul exam:
- LS1100-L1: General Chemistry, written exam, 90 min, 100% modul grade

Prerequisite for the participation in the practical course is
the participation in the general health and safety briefing.

Everybody needs the physical conditions to work independently and self-acting in the chemical laboratory.
See also HM1-10060.

MA2000-KP09 - Analysis 1 (Ana1KP09)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	9

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (compulsory), mathematics / computer science, 1st semester
- Bachelor MLS 2018 (compulsory), life sciences, 1st semester
- Bachelor MLS 2016 (compulsory), life sciences, 1st semester

Classes and lectures:

- Analysis 1 (lecture, 4 SWS)
- Analysis 1 (exercise, 3 SWS)

Workload:

- 140 Hours private studies
- 105 Hours in-classroom work
- 25 Hours exam preparation

Contents of teaching:

- Sequences and series
- Functions and continuity
- Differentiability, Taylor series
- Metric and normalized spaces, basic topological concepts
- Multivariate differential calculus
- Basic knowledge of linear algebra

Qualification-goals/Competencies:

- Students understand the basic terms of analysis, especially the concept of convergence.
- Students understand the basic thoughts and proof techniques.
- Students can explain basic relationships in analysis.
- Students can apply the basic concepts and proof techniques.
- Students have an understanding for abstract structures.
- Interdisciplinary qualifications:
- Students have a basic competence in modeling.
- Students can transfer theoretical concepts to similar applications.
- Students can work as a group on elementary mathematical problems.

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Jürgen Prestin

Teacher:

- Institute for Mathematics

- Prof. Dr. rer. nat. Jürgen Prestin
- Dr. rer. nat. Jörn Schnieder
- PD Dr. rer. nat. Christian Bey

Literature:

- K. Fritzsche: Grundkurs Analysis 1 + 2
- H. Heuser: Lehrbuch der Analysis 1 + 2
- K. Burg, H. Haf, F. Wille, A. Meister: Höhere Mathematik für Ingenieure
- R. Lasser, F. Hofmaier: Analysis 1 + 2

Language:

- offered only in German

Notes:

Prerequisites for attending the module:
- None

Prerequisites for the written exam:
- Successful completion of homework assignments during the semester
- Successful completion of e-tests

Modul exam:
MA2000-L1: Analysis 1, written exam, 90 min, 100 % module grade

ME1010-KP06, ME1010-MLS - Physics 1 (Physik1KP6)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	6

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (compulsory), physics, 1st semester
- Bachelor MLS 2018 (compulsory), life sciences, 1st semester
- Bachelor MLS 2016 (compulsory), life sciences, 1st semester
- Bachelor MLS 2009 (compulsory), life sciences, 1st semester

Classes and lectures:

- Physics 1 (lecture, 4 SWS)

Workload:

- 120 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Physical values, units, accuracy, measurement errors
- Mathematical methods and notations
- Kinematics of point mass, Newton s Axioms, contact forces, modulus, virtual forces, Newton s equation of motion, differential equations
- Work and energy, power and efficiency, momentum, inertia, physical pendulum, momentum of rotation
- Conservation laws and symmetries
- Gravitation, oscillation, waves, acoustics, Doppler effect
- Resting and flowing gases and liquids, effects of surfaces and interfaces
- Temperature, thermometer, therm. expansion, state equations, kinetic gas theory
- Van-der-Waals state equation, heat capacity, heat conduction, 1st law of thermodynamics, volume work, p-V diagram
- Adiabatic processes, 2nd law of thermodynamics, thermal engines and Carnot cycle, efficiency, heat pump
- Entropy, disorder and probability, 3rd law of thermodynamics

Qualification-goals/Competencies:

- You can name the basic laws of physics
- You can measure according to physics rules
- You can explain physical laws based on observations
- You can formally analyze physical problems
- You can judge which concept is best suited to solve a certain problem
- You can design novel physical experiments on your own

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Martin Koch

Teacher:

- Institute of Biomedical Optics
- Institute of Medical Engineering
- Institute of Physics

- Prof. Dr. rer. nat. Robert Huber
- Prof. Dr. rer. nat. Christian Hübner
- PD Dr. rer. nat. Hauke Paulsen
- Prof. Dr. rer. nat. Martin Koch
- Prof. Dr.-Ing. Maik Rahlves

Literature:

- Douglas C. Giancoli: Physik

Language:

- offered only in German

Notes:

Prerequisites for the modul:
- nothing

Prerequisites for admission to the written examination:
- nothing

Modul exam:
- ME1010-L1: Physics 1, written exam, 90 min, 100 % modul grade

LS1500-KP06, LS1500 - Biology 2 (Bio2)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	6

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (compulsory), life sciences, 2nd semester
- Bachelor MLS 2018 (compulsory), life sciences, 2nd semester
- Bachelor MLS 2016 (compulsory), life sciences, 2nd semester
- Bachelor MLS 2009 (compulsory), life sciences, 2nd semester

Classes and lectures:

- Genetics (lecture, 2 SWS)
- Histology (lecture, 1 SWS)
- Histology (practical course, 2 SWS)

Workload:

- 105 Hours private studies
- 75 Hours in-classroom work

Contents of teaching:

- Part A Gnetics: a) Bacterial Genetics The bacterial cell
- Cell division and replication of the bacterial chromosome
- Gene organization and gene expression
- Bacterial pathogenicity factors
- Mutations in bacteria
- Accessory genetic elements and gene transfer mechanisms
-
- b) Human Genetics
- Cytogenetics
- Inheritances and definitions
- Mutations
- Trinucleotide repeat expansions (TRE)
- Epigenetics
- Molecular pathology
- Part B Histology:Lecture: Preparation of tissue specimen
- General microscopy
- Epithelium, glands
- Connective tissues
- Cartilage and bone
- Muscle
- Neural tissue
- Skin
- Blood, vascular system and bone marrow
- Lymphatic organs
- Introduction in immunology
- Practical course Microscopy, Histology: Microscopy of cell structure and cell size as taught in the histology lectures. Critical investigation under the microscope. Drawing of the corresponded tissues (from the histology lectures)

Qualification-goals/Competencies:

- Part A Genetics:Understanding of the heredity
- Mutations and verific
- Bacterial genetics
- Part B Histology section:
- They can identify different histological stainings
- They can explain the structure of tissues containing site-specific cells and extracellular matrix molecules
- They can determine the 4 basic tissues and explain their functions
- They can explain the process of bone formation and remodeling
- They can identify unmature and mature blood cells
- They can describe the structure of lymphatic organs

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Kathrin Kalies

Teacher:

- Research Center Borstel, Leibniz Lung Center
- Institute of Human Genetics
- Institute of Anatomy

- Prof. Dr. rer. nat. Kathrin Kalies
- Prof. Dr. med. Malte Spielmann
- Prof. Dr. rer. nat. Martin Kircher
- Priv.-Doz. Dr. rer. nat. Sven Müller-Loennies

Literature:

- Lüllmann-Rauch: Histologie - Thieme Verlag, Stuttgart
- Jeremy W. Dale, Simon F. Park: Molecular Genetics of Bacteria - Wiley Blackwell
- Larry Snyder, Joseph E. Peters, Tina M. Henkin, Wendy Champness: Molecular Genetics of Bacteria - ASM Books

Language:

- offered only in German

Notes:

Prerequisites for attending the module:
- None

Prerequisites for the exam:
- Regular and successful participation in the internship, at least 80%

Modul exam:
- LS1500-L1: Biology 2, written exam, 90 min, 100 % module grade (arithmetic mean of the part Genetics and Histology)

LS1600-KP10, LS1600-MLS - Organic Chemistry (OCKP10)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	10

Course of study, specific field and term:

- Bachelor Nutritional Medicine 2024 (compulsory), Chemistry, 2nd semester
- Bachelor Molecular Life Science 2024 (compulsory), Chemistry, 2nd semester
- Bachelor MLS 2018 (compulsory), life sciences, 2nd semester
- Bachelor MLS 2016 (compulsory), life sciences, 2nd semester

Classes and lectures:

- Organic Chemistry for MLS (lecture, 3 SWS)
- Organic Chemistry for MLS (exercise, 1 SWS)
- Organic Chemistry for MLS (practical course, 4 SWS)

Workload:

- 180 Hours private studies
- 120 Hours in-classroom work

Contents of teaching:

- Lectures:
- Alkanes, cycloalkanes, Alkenes and Alkynes
- Aromatics
- Stereochemistry
- Substitution and elimination reactions
- Alcohols, Phenols and Thiols
- Ether and Epoxides
- Aldehydes and ketones
- Carboxylic acids and derivativs
- Amines and derivativs
- NMR-Spectroscopy and structure analysis
- Heterocycles
- Lipids, Carbohydrates, Amino acids and peptides, Nucleotides and nucleic acids
- Exercises:
- Students discuss problems covering all topics of the lectures on the black board
- Practical course:
- Students work self-actingly and independently in a chemical laboratory with regard to the roles of GSP of the University of Lübeck and of the DFG-guidelines on the following topics:
- Equilibrium distributions and selected physico-chemical separation processes
- Threedimensional structures of organic molecules; Reaction mechanism
- Sytheses and analytical methods, e.g. ASS-Synthesis, anlytics with HPLC, LC, melting-point and NMR-spectroscopy
- Different reactions of biologically relevant molecules
- Extraction of cholesterol from chickeneggs
- Quantitative determination of protein concentration with spectroscopic methods

Qualification-goals/Competencies:

- After successful completion of the course, students have a fundamental knowledge of organic chemistry. They are confident using structural formulas of substance classes and functional groups presented in the course. They are confident in the nomenclature and can correctly describe relative and absolute configurations of molecules.
- Students know the most important reactions, reaction types and reaction principles of organic chemistry. They understand the structural properties of functional groups and are able to formulate organic chemical reaction mechanisms of these groups.
- Students acquire the principles of techniques in organic chemistry and are able to independently and self-actingly carry out simple organic reactions by following published protocols. They have a basic understanding of how to purify and analyze their reaction mixtures in order to correctly isolate and identify the desired products.
- Students have a basic knowledge of NMR spectroscopy and understand which information can be extracted from basic one and two dimensional NMR spectra. They are able to interpret simple NMR spectra and to assign the signals to the functional groups of the molecules.
- Students are capable to document and evaluate the conducted experiments using technical terms in a structured fashion with regard to the roles of GSP of the University of Lübeck and of the DFG-guidelines.. The have learned the principles of presentations and are capable of presenting chemical issues in a scientifically correct and understandable way.
- Students can transfer and apply the acquired theoretical and practical skills to problems of other branches of chemistry and related sciences and are thus able to participate in continuative courses.

-

Grading through:

- written exam

Requires:

- General Chemistry (LS1100-KP10, LS1100-MLS)

Responsible for this module:

- PD Dr. phil. nat. Thomas Weimar

Teacher:

- Institute of Chemistry and Metabolomics

- PD Dr. phil. nat. Thomas Weimar
- Dr. rer. nat. Thorsten Biet
- Prof. Dr. rer. nat. Karsten Seeger

Literature:

- Buice, P.Y.: Organische Chemie - Pearson Studium
- Hart, H., L.E. Craine, D.J. Hart: Organische Chemie - Wiley-VCH
- Buddrus, J.: Organische Chemie - De Gruyter Verlag

Language:

- offered only in German

Notes:

Prerequisites for the modul:
- LS1100-KP10 has to be passed

Prerequisites for admission to the written examination:
- succesful participation in the practical course with all tests.

Modul exam:
- LS1600-L1: Organic Chemistry, written exam, 90 min, 100 % module grade

Everybody needs the physical conditions to work independently and self-actingly in the chemical laboratory.

MA2500-KP05, MA2500-MLS - Analysis 2 (Ana2KP05)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	5

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (compulsory), mathematics / computer science, 2nd semester
- Bachelor MLS 2018 (compulsory), mathematics / computer science, 2nd semester
- Bachelor MLS 2016 (compulsory), mathematics / computer science, 2nd semester
- Bachelor MLS 2009 (compulsory), mathematics / computer science, 2nd semester

Classes and lectures:

- Analysis 2 (lecture, 2 SWS)
- Analysis 2 (exercise, 2 SWS)

Workload:

- 75 Hours private studies
- 60 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

- Integral calculus for functions of one real variable (indefinite integrals, antiderivatives, substitution, partial fractions, definite integrals, fundamental theorem of calculus)
- Sequences and series of functions
- Fourier series (trigonometric polynomials, convergence)

Qualification-goals/Competencies:

- Students understand the advanced terms of analysis, such as even convergence.
- Students understand the advanced thoughts and proof techniques.
- Students can explain advanced relationships in analysis.
- Interdisciplinary qualifications:
- Students can transfer advanced theoretical concepts to similar applications.
- Students can work as a group on complex mathematical problems.

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Jürgen Prestin

Teacher:

- Institute for Mathematics

- Prof. Dr. rer. nat. Jürgen Prestin
- PD Dr. rer. nat. Christian Bey

Literature:

- K. Fritzsche: Grundkurs Analysis 1 + 2
- H. Heuser: Lehrbuch der Analysis 2
- K. Burg, H. Haf, F. Wille, A. Meister: Höhere Mathematik für Ingenieure
- R. Lasser, F. Hofmaier: Analysis 1 + 2

Language:

- offered only in German

Notes:

Prerequisites for attending the module:
- None

Prerequisites for the exam:
- Successful completion of homework assignments during the semester.
- Successful completion of e-tests

Modul exam:
- MA2500-L1: Analysis 2, written examination, 90 min, 100 % module grade

ME1022-KP10 - Physics 2 (Phy2KP10)

Duration:	Turnus of offer:	Credit points:
2 Semester	every summer semester	10

Course of study, specific field and term:

- Bachelor MLS 2016 (compulsory), life sciences, 2nd semester

Classes and lectures:

- Physics 2 (lecture, 4 SWS)
- Practical course (practical course, 3 SWS)

Workload:

- 135 Hours in-classroom work
- 90 Hours private studies
- 55 Hours written report
- 20 Hours exam preparation

Contents of teaching:

- Electric charge, Coulomb force, electric field, electric potential, capacity
- Stationary electric current, resistor, Kirchhoff s laws
- Magnetic field, magnetic dipole, electric current and magnetic field
- Electromagnetic induction, resonant circuit
- Nonstationary electric and magnetic fields, displacement current, Maxwell s equations
- Refraction, reflexion
- Geometrical optics, image generation, lenses, aberrations, optical instruments
- Interference, diffraction, resolution power
- Polarization, birefringence, Brewster s angle
- Relativity theory
- Bohr s atomic model, spectral lines, quantum mechanical atomic model
- Molecules and solid bodies
- Practical course:
- Experiment 1: fluid dynamics
- Experiment 2: heat
- Experiment 3: non stationary current
- Experiment 4: stationary current
- Experiment 5: spectrometer
- Experiment 6: diffusion
- Experiment 7: wave optics
- Experiment 8: geometrical optics
- Experiment 9: radio activity
- Experiment 10: sound and ultrasound

Qualification-goals/Competencies:

- You can name the basic laws of physics
- You can measure according to physics rules
- You can explain physical laws based on observations
- You can formally analyze physical problems
- You can judge which concept is best suited to solve a certain problem
- You can design novel physical experiments on your own
- Hands-on access to physical relations
- Graphical representation of experimental data
- Excellence in interpreting data
- Excellence in documating data and teamwork
- Basic knowledge in safety measures in the lab

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Robert Huber
- Prof. Dr. rer. nat. Thorsten Buzug
- Prof. Dr. rer. nat. Christian Hübner

Teacher:

- Institute of Biomedical Optics
- Institute of Medical Engineering
- Institute of Physics

- Prof. Dr. rer. nat. Robert Huber
- Prof. Dr. rer. nat. Christian Hübner
- PD Dr. rer. nat. Hauke Paulsen
- Prof. Dr. rer. nat. Thorsten Buzug

Literature:

- Douglas C. Giancoli: Physik

Language:

- offered only in German

LS2200-KP04, LS2200 - Introduction into Biophysics (EinBiophy)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	4

Course of study, specific field and term:

- Bachelor CLS 2023 (optional subject), life sciences, 5th semester
- Bachelor Biophysics 2024 (compulsory), biophysics, 3rd semester
- Bachelor Molecular Life Science 2024 (compulsory), life sciences, 3rd semester
- Bachelor MES 2020 (optional subject), mathematics / natural sciences, 3rd semester at the earliest
- Bachelor MLS 2018 (compulsory), life sciences, 3rd semester
- Bachelor MLS 2016 (compulsory), life sciences, 3rd and 4th semester
- Bachelor CLS 2016 (optional subject), life sciences, 5th semester
- Bachelor Nutritional Medicine 2016 (compulsory), biophysics, 3rd semester
- Bachelor Biophysics 2016 (compulsory), biophysics, 3rd semester
- Bachelor MES 2014 (optional subject), mathematics / natural sciences, 3rd or 5th semester
- Bachelor MLS 2009 (compulsory), life sciences, 3rd and 4th semester
- Bachelor CLS 2010 (optional subject), life sciences, 5th semester
- Bachelor MES 2011 (compulsory), medical engineering science, 5th semester

Classes and lectures:

- Introduction into Biophysics (lecture, 2 SWS)
- Biophysics (Excercise or practical course, 1 SWS)

Workload:

- 50 Hours private studies
- 45 Hours in-classroom work
- 15 Hours written report
- 10 Hours exam preparation

Contents of teaching:

- Biological macro molecules, structure, forces
- Proteins, structure, properties
- Biomembranes, structure, properties
- Mechanical properties of cells
- Thermo dynamics of biological processes

Qualification-goals/Competencies:

- You can assign forces in biological systems
- You become familiar with the basic aspects of living matter
- You gain the expertise to simplify complex living systems
- You can choose and apply appropriate experimental methods for the study of living matter

Grading through:

- written exam

Responsible for this module:

- Dr. Young-Hwa Song

Teacher:

- Institute of Physics

- Dr. Young-Hwa Song
- Prof. Dr. rer. nat. Christian Hübner

Literature:

- Volker Schünemann: Biophysik: Eine Einführung
- Werner Mäntele: Biophysik

Language:

- offered only in German

Notes:

Prerequisites for the module:
- None

Prerequisites for admission to the written examination:
- Successful participation in the exercises as specified at the beginning of the semester

Module exam:
- LS2200-L1: Introduction into Biophysics, written exam, 120 min, 100 % of module grade

The lecture and exercises take place in the winter semester, the practical course in the summer semester.
Whether exercises or a practical course take place is specified in the SGO of the respective study program.
Prerequisite for the understanding of the lecture is the knowledge of the basics of inorganic and organic chemistry.

LS2000-KP10 - Biochemistry 1 (Bioch1KP10)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	10

Course of study, specific field and term:

- Bachelor Nutritional Medicine 2024 (compulsory), life sciences, 3rd semester
- Bachelor Molecular Life Science 2024 (compulsory), life sciences, 3rd semester
- Bachelor MLS 2018 (compulsory), life sciences, 3rd semester
- Bachelor Nutritional Medicine 2018 (compulsory), life sciences, 3rd semester
- Bachelor Nutritional Medicine 2016 (compulsory), life sciences, 3rd semester
- Bachelor MLS 2016 (compulsory), life sciences, 3rd semester

Classes and lectures:

- Biochemistry I (lecture, 4 SWS)
- Biochemistry I (practical course, 4 SWS)

Workload:

- 180 Hours private studies
- 120 Hours in-classroom work

Contents of teaching:

- Lectures:
- Characteristics of biosystems
- Biomolecules
- Proteins: structure and dynamics
- Enzymes: structure, function, regulation
- Metabolism of carbohydrates: Properties of carbohydrates, Functions of carbohydrates, Metabolic pathways
- Citric acid cycle
- Membrane transport and cellular respiration
- Practical:
- Biological buffer systems
- Photometric methods / hemoglobin
- Enzymatic Catalysis
- Characterization of carbohydrates
- Bioenergetics

Qualification-goals/Competencies:

- Students can understand structures and functions of basic biomolecules
- They can understand biochemical interrelations and their importance for cellular metabolism
- They have acquired basic knowledge of medical aspects of biochemistry
- They have acquired the basic ability to experiment independently and autonomously, taking into account environmental protection and occupational safety and the handling of hazardous substances (according to Globally Harmonized System of Classification and Labeling of Chemicals (GHS)) and the GWP guideline of the University of Lübeck in accordance with the DFG guidelines
- They can understand and apply biochemical separation and analysis methods
- They can record, interpret, quantitatively evaluate and interpret results from biochemical experiments
- They can estimate the biotechnological potential of biomolecules

Grading through:

- colloquiums and protocols
- written exam

Requires:

- Organic Chemistry (LS1600-KP10, LS1600-MLS)

Responsible for this module:

- Prof. Dr. Thomas Krey

Teacher:

- Institute of Biochemistry

- Prof. Dr. Thomas Krey
- Dr. Mariana Grieben

- Prof. Dr. Lars Redecke
- Dr. math. et dis. nat. Jeroen Mesters
- Dr. rer. nat. Janna Bigalke
- PD Dr. rer. nat. Guido Hansen
- Dr. rer. nat. Ksenia Pumpor

Literature:

- Voet/Voet: Biochemistry - 5th edition, 2018, Wiley
- Lehninger: Principles of Biochemistry - 7th edition, 2017, Freeman
- Stryer: Biochemistry - 9th edition, 2019, Freeman
- Lodish et al.: Molecular Cell Biology - 9th edition, 2021, Freeman
- Alberts et al.: Molecular Biology of the Cell - 6th edition, 2015, Garland Science

Language:

- German and English skills required

Notes:

Prerequisites for the module:
- LS1600-L1 Organic Chemistry

Prerequisites for admission to the written examination:
- None

Module exam:
- LS2000-L1: Biochemistra 1, written exam, 180 min, 70 % module grade
- LS2000-L2: Protocolle and Colloquien 30 % module grade

LS2600-KP06, LS2601 - Biological Chemistry (BiolChem06)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	6

Course of study, specific field and term:

- Master CLS 2023 (compulsory), MML with specialization in Life Science, 1st semester
- Bachelor Molecular Life Science 2024 (compulsory), Chemistry, 3rd semester
- Bachelor MLS 2018 (compulsory), Chemistry, 3rd semester
- Bachelor MLS 2016 (compulsory), life sciences, 3rd semester
- Master CLS 2016 (compulsory), MML with specialization in Life Science, 1st semester
- Bachelor MLS 2009 (compulsory), life sciences, 3rd semester

Classes and lectures:

- Biological Chemistry (lecture, 4 SWS)

Workload:

- 120 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Lecture topics:
- What is Biological Chemistry?
- The nature of chemical bonds
- Chemical reactions to modify proteins
- Synthesis of peptides
- Chemical analytics - MS and NMR
- Metabolic labeling
- Chemical reactions to follow the fate of molecules in cells and whole organisms

Qualification-goals/Competencies:

- The nature of chemical bonds - an in depth treatment based on quantum mechanical principles
- How to use synthetic organic chemistry to solve biological questions
- In-depth treatment of reaction mechanisms of chemical reactions important in biological systems
- Analytical techniques to identify and characterize compounds
-
-
-

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Ulrich Günther

Teacher:

- Institute of Chemistry and Metabolomics

- Prof. Dr. rer. nat. Ulrich Günther
- Dr. Alvaro Mallagaray
- Prof. Dr. rer. nat. Karsten Seeger
- PD Dr. phil. nat. Thomas Weimar

Literature:

- Paula Y. Bruice: Organic Chemistry - Pearson Verlag
- James Keeler and Peter Wothers: Chemical Structure and Reactivity: An integrated approach - Oxford University Press, 2008; second ed. 2013ISBN: 978-0-19-928930-1

Language:

- offered only in German

Notes:

Prerequisites for the module:
- None

Prerequisites for admission to the written examination:
- None

Modul exam(s):
- LS2600-L1: Biological Chemistry, written exam, 90 min, 100 % of module grade

MZ2200-KP06 - Physiology (PhysioKP06)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	6

Course of study, specific field and term:

- Bachelor Biophysics 2024 (compulsory), life sciences, 5th semester
- Bachelor Nutritional Medicine 2024 (compulsory), life sciences, 3rd semester
- Bachelor Molecular Life Science 2024 (compulsory), life sciences, 3rd semester
- Bachelor MLS 2018 (compulsory), life sciences, 3rd semester
- Bachelor Nutritional Medicine 2018 (compulsory), life sciences, 3rd semester
- Bachelor MLS 2016 (compulsory), life sciences, 3rd semester
- Bachelor Nutritional Medicine 2016 (compulsory), life sciences, 3rd semester
- Bachelor Biophysics 2016 (compulsory), life sciences, 5th semester

Classes and lectures:

- Physiology (lecture, 4 SWS)
- Physiology (seminar, 1 SWS)

Workload:

- 120 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Cell physiology & cell-to-cell communication
- Sensory & neuronal physiology
- Motor systems and respiration
- Cardiovascular and immune system
- Kidney physiology, electrolyte homeostasis and pH regulation
- Energy metabolism and homeostasis
- Endocrine system
- Circadian rhythms and sleep

Qualification-goals/Competencies:

- The students understand the cellular and molecular processes in living organisms.
- They understand the integrative processes in healthy humans.
- They are capable to interprete the physiological functions in a scientific way.

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Henrik Oster

Teacher:

- Institute of Neurobiology

- Prof. Dr. rer. nat. Henrik Oster
- Dr. rer. nat. Violetta Pilorz

Literature:

- Schmidt et al.: Physiolologie des Menschen - Springer, Heidelberg
- Rhoades et al.: Medical Physiology - Lippincott Raven, Philadelphia
- Speckmann et al.: Physiologie - Elsevier, Amsterdam

Language:

- offered only in German

Notes:

Prerequisites for the modul:
- nothing

Prerequisites for admission to the written examination:
- succesful participation in the seminar

Modul exam:
- MZ2200-L1: Physiologie, written exam, 90 min, 100 % module grade

LS2300-KP08, LS2301 - Biophysical Chemistry (BPCKP08)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	8

Course of study, specific field and term:

- Master CLS 2023 (compulsory), MML with specialization in Life Science, 2nd semester
- Bachelor Biophysics 2024 (compulsory), biophysics, 4th semester
- Bachelor Molecular Life Science 2024 (compulsory), Chemistry, 4th semester
- Bachelor MLS 2018 (compulsory), Chemistry, 4th semester
- Bachelor MLS 2016 (compulsory), Chemistry, 4th semester
- Master CLS 2016 (compulsory), MML with specialization in Life Science, 2nd semester
- Bachelor Biophysics 2016 (compulsory), biophysics, 4th semester
- Master CLS 2010 (optional subject), computational life science / life sciences, 2nd semester
- Bachelor MLS 2009 (compulsory), life sciences, 4th semester

Classes and lectures:

- Biophysical Chemistry (lecture, 3 SWS)
- Biophysical Chemistry (exercise, 1 SWS)
- Biophysical Chemistry (practical course, 3 SWS)

Workload:

- 160 Hours private studies
- 80 Hours in-classroom work

Contents of teaching:

- Lecture topics:
- What is Biophysical Chemistry?
- Basics of NMR spectroscopy
- Basics of mass spectrometry
- Theoretical calculation of molecules - Quantum mechanics or molecular mechanics?
- Basics of chemical thermodynamics
- Thermodynamics of ligand binding
- Basics of chemical kinetics
- Basics of enzyme kinetics
- Molecular Mechanics
- Practical works:
- NMR, Molecular Modeling, experiments with a focus on thermodynamics and kinetics

Qualification-goals/Competencies:

- Acquire basic knowledge on spectroscopic techniques to analyze (bio)molecules. Focus is on NMR and mass spectrometry techniques
- Insight into properties (e.g. structure, dynamics, spectroscopic properties) of molecules employing theoretical models. Acquisition of basic knowledge to compute molecules
- Application of laws of thermodynamics to describe chemical reactions and biological processes with a focus on binding and recognition reactions in biological systems
- Acquire basic knowledge to analyze time courses of chemical reactions and biological processes
- Acquisition of skills to work independently and self-determined in the laboratory with regard to the roles of GSP of the University of Lübeck and of the DFG-guidelines.
-

Grading through:

- written exam

Requires:

- Organic Chemistry (LS1600-KP10, LS1600-MLS)

Responsible for this module:

- Prof. Dr. rer. nat. Ulrich Günther

Teacher:

- Institute of Chemistry and Metabolomics
- Prof. Dr. rer. nat. Ulrich Günther

- PD Dr. phil. nat. Thomas Weimar

Literature:

- James Keeler and Peter Wothers: Chemical Structure and Reactivity: An integrated approach - Oxford University Press, 2008; second ed. 2013

Language:

- offered only in German

Notes:

Prerequisites for the modul:
- None

Prerequisites for admission to the written examination:
- Successful completion of the excercises as specified at the beginning of the semester

Modul exam(s):
- LS2300-L1: Biophysical Chemistry, written exam, 90 min, 100 % of module grade
- LS2300-L2: Practical course Biophysical Chemistry, ungraded practical course, 0 % of module grade, has to be passed

MML: Optional course in the 2nd semester master program with specialisation in Life Science

Biophysics: some specific practicals

The practical course takes place in September as compact course. Prerequisite LS1600 and LS2600

The module is better understandable if the modules Physics 1 or 2 have been attended before.

(Share of Institute of Physics in practical course is 25%.)

LS2510-KP10 - Biochemistry 2 (Bioch2KP10)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	10

Course of study, specific field and term:

- Bachelor Nutritional Medicine 2024 (compulsory), life sciences, 4th semester
- Bachelor Molecular Life Science 2024 (compulsory), life sciences, 4th semester
- Bachelor MLS 2018 (compulsory), life sciences, 4th semester
- Bachelor Nutritional Medicine 2018 (compulsory), life sciences, 4th semester
- Bachelor Nutritional Medicine 2016 (compulsory), life sciences, 4th semester
- Bachelor MLS 2016 (compulsory), life sciences, 4th semester

Classes and lectures:

- Biochemistry 2 (lecture, 4 SWS)
- Biochemistry 2 (practical course, 4 SWS)

Workload:

- 180 Hours private studies
- 120 Hours in-classroom work

Contents of teaching:

- Lectures:
- Structure and function of DNA and RNA
- Immunology
- N metabolism
- Amino acid metabolism
- Lipid metabolism
- Signal transduction and ho
- Practical course
- Proteins: General properties and separation methods
- Protein biosynthesis
- Polymerase chain reaction (PCR) and DNA
- Immunological methods

Qualification-goals/Competencies:

- Students can understand structures and functions of basic biomolecules
- They can understand biochemical relationships and their importance for cellular metabolism
- They can understand complex cell biological relationships
- They will be able to experiment independently and autonomously, taking into account environmental protection and occupational safety and the handling of hazardous substances (according to Globally Harmonized System of Classification and Labeling of Chemicals (GHS)) and the GWP guideline of the University of Lübeck in accordance with the DFG guidelines.
- They can understand and apply biochemical separation and analysis methods
- They can record, quantitatively evaluate and interpret results from biochemical experiments.
- They can correctly document and act with English technical literature
- They can estimate biotechnological potential of biomolecules

Grading through:

- written exam

Requires:

- Organic Chemistry (LS1600-KP10, LS1600-MLS)

Responsible for this module:

- Prof. Dr. Thomas Krey

Teacher:

- Institute of Biochemistry

- Prof. Dr. Thomas Krey
- Dr. Mariana Grieben
- PD Dr. rer. nat. Guido Hansen
- Dr. rer. nat. Janna Bigalke

- Dr. math. et dis. nat. Jeroen Mesters
- Prof. Dr. Lars Redecke
- Dr. rer. nat. Ksenia Pumpor

Literature:

- Voet/Voet: Biochemistry - 5th edition, 2018, Wiley
- Lehninger: Principles of Biochemistry - 7th edition, 2017, Freeman
- Stryer: Biochemistry - 7th edition, 2012, Freeman
- Stryer: Biochemistry - 9th edition, 2019, Freeman
- Lodish et al.: Molecular Cell Biology - 9th edition, 2021, Freeman
- Alberts et al.: Molecular Biology of the Cell - 6th edition, 2015, Garland Science

Language:

- German and English skills required

Notes:

Prerequisites for the module:
- LS1600-L1 Organic Chemistry

Prerequisites for admission to the written examination:
- None

Module exam:
- LS2510-L1: Biochemistry 2, written exam, 120 min, 70 % module grade
- LS2510-L2: Protocolls and Colloquim 30 % module grade

LS2700-KP09 - Cell biology (ZellBioKP0)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	9

Course of study, specific field and term:

- Bachelor Nutritional Medicine 2016 (compulsory), life sciences, 4th semester
- Bachelor MLS 2016 (compulsory), life sciences, 4th semester

Classes and lectures:

- Cell biology (lecture, 3 SWS)
- Cell biology (practical course, 4 SWS)

Workload:

- 165 Hours private studies
- 105 Hours in-classroom work

Contents of teaching:

- Lectures:
- Special structure of cells
- Cell cycle and apoptosis
- Introduction into developmental biology
- Practical course (groups of 2):
- Basics in cell culture techniques
- Staining of cellular structures
- Cell fractionation and functional analysis of organelles
- Behaviour of cells during stress
- Protein pattern of apoptotic cells
- Differentiation of cells

Qualification-goals/Competencies:

- Principle of the basic function of the eukaryotic cells
- Detailed knowledge in all areas of cell biology covered by the lecture (see
- Basic skills to design and perform their own experiments in the area of cell biology
- Handling of basic cell biology techniques
- Improving the ability to document results correctly and to work in a team

Grading through:

- written exam (test achievement)

Requires:

- Biochemistry 1 (LS2000-KP10)
- Biology 1 (LS1000-KP06)

Responsible for this module:

- Prof. Dr. rer. nat. Enno Hartmann

Teacher:

- Institute of Medical and Marine Biotechnology
- Institute of Virology and Cell Biology
- Institute for Biology

- Prof. Dr. rer. nat. Enno Hartmann
- PD Dr. rer. nat. Kai-Uwe Kalies
- Prof. Dr. rer. nat. Charli Kruse
- Prof. Dr. rer. nat. Stefan Taube
- Dr. rer. nat. Olaf Isken
- Dr. rer. nat. Daniel Hans Rapoport
- Dr. rer. nat. Anna Matthießen
- Dr. rer. nat. Sandra Schumann

Literature:

- Lodish: Molecular Cell Biology

- Pollard: Cell Biology
- Wolpert: Principles of Development
- Alberts: Molecular Biology of the Cell

Language:

- offered only in German

Notes:

Knowledge in Biology 1 and 2 and Biochemistry 1 is a prerequisite for this course. Entrance requirement for the practical course: Certificate of the course Biology 1 and Biochemistry 1

Admission requirements for taking the module:
- None

Admission requirements for participation in module examination(s):
- Successful participation in the practical course incl. test according to the requirements at the beginning of the semester.

Module examination(s):
- LS2700-L1: Cell Biology, written exam, 90 min, 100 % of the module grade.

(Share of Biology in V is 66,6%)
(Share of Virology in V is 33,3%)
(Share of Virology in P is 90%)
(Share of Medical and Marine Biotechnology in P is 10%)

LS2801-KP04 - Selected methods of nucleic acid biology (MethNuklS)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each summer semester	4	9

Course of study, specific field and term:

- Bachelor Biophysics 2024 (optional subject), life sciences, 6th semester
- Bachelor Molecular Life Science 2024 (optional subject), life sciences, 4th or 6th semester
- Bachelor MLS 2018 (optional subject), life sciences, 4th semester
- Bachelor MLS 2016 (optional subject), life sciences, 4th semester

Classes and lectures:

- Selected methods of nucleic acid biology (practical course as compact course, 3 SWS)

Workload:

- 70 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- Studying nucleic acid/protein interactions
- Isolation and analysis of total RNA from eukaryotic cells
- Automated Sanger-Sequencing

Qualification-goals/Competencies:

- Students learn basic molecular methods for handling nucleic acids and proteins
- Students are able to translate theoretical contexts into independent and autonomous experimental work

Grading through:

- continuous, successful participation in practical course

Responsible for this module:

- Dr. rer. nat. Rosel Kretschmer-Kazemi Far

Teacher:

- Institute of Molecular Medicine
- Dr. rer. nat. Ralf Werner
- Dr. rer. nat. Rosel Kretschmer-Kazemi Far

Literature:

- : - Work instructions, scientific publications

Language:

- offered only in German

Notes:

Maximal group size: 9

Prerequisites for attending the module:
- None

Prerequisites for the exam:
- Successful completion of protocols during the semester.

LS2802-KP04 - Introduction into anatomy (WPAnat)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each winter semester	4	10

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (optional subject), life sciences, 5th semester
- Bachelor MLS 2018 (optional subject), life sciences, 5th semester
- Bachelor MLS 2016 (optional subject), life sciences, 4th semester

Classes and lectures:

- Anatomie for technical study programs MZ2100A (lecture, 2 SWS)

Workload:

- 75 Hours private studies
- 30 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

Qualification-goals/Competencies:

Grading through:

- written exam
- B-Certificate (not graded)

Responsible for this module:

- Prof. Dr. rer. nat. Kathrin Kalies

Teacher:

- Institute of Anatomy
- Prof. Dr. rer. nat. Kathrin Kalies

Language:

- offered only in German

LS2803-KP04 - Model organisms in molecular biology research (BioModOrg)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each summer semester	4	16

Course of study, specific field and term:

- Bachelor Biophysics 2024 (optional subject), life sciences, 6th semester
- Bachelor Molecular Life Science 2024 (optional subject), life sciences, 4th or 6th semester
- Bachelor MLS 2018 (optional subject), life sciences, 4th semester
- Bachelor MLS 2016 (optional subject), life sciences, 4th semester
- Bachelor Biophysics 2016 (optional subject), life sciences, 6th semester

Classes and lectures:

- Model organisms in molecular biology research (lecture, 1 SWS)
- Model organisms in molecular biology research (exercise, 2 SWS)

Workload:

- 70 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- Microorganisms Saccharomyces cerevisae
- Green plants Arabidopsis thaliana
- Invertebrates I Caenorhabditis elegans
- Invertebrates II Drosophila melanogaster
- Vertebrates II Danio rerio
- Vertebrates II Mus musculus
- Phylogeny of model organisms

Qualification-goals/Competencies:

- basic understanding of the biology of the organisms presented
- basic understanding of the advantages and disadvantages of the different model organisms for biological research
- basic practical abilities in self-acting handling these organisms

Grading through:

- Active participation in all course days

Requires:

- Biology 1 (LS1000-KP06)

Responsible for this module:

- Dr. rer. nat. Alexandra Schatt

Teacher:

- Institute for Biology

- Prof. Dr. rer. nat. Enno Hartmann
- Dr. rer. nat. Nicole Sommer
- Prof. Dr. rer. nat. Christian Schmidt
- Dr. rer. nat. Carla Schulz
- Dr. rer. nat. Alexandra Schatt
- Priv.-Doz. Dr. rer. nat. Aleksander Rakovic

Literature:

- : - zur Einführung: Campbell Allgemeine Biologie die entsprechenden Kapitel

Language:

- offered only in German

LS2804-KP04 - Experimentel Physiology (ExpPhysio)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each summer semester	4	12

Course of study, specific field and term:

- Bachelor Biophysics 2024 (optional subject), life sciences, 6th semester
- Bachelor Molecular Life Science 2024 (optional subject), life sciences, 4th or 6th semester
- Bachelor MLS 2018 (optional subject), life sciences, 4th semester
- Bachelor MLS 2016 (optional subject), life sciences, 4th semester

Classes and lectures:

- Experimentel Physiology (lecture, 2 SWS)
- Experimentel Physiology (seminar, 1 SWS)

Workload:

- 70 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- Experiments on isolated organs and physiological studies in humans:
- Practical course for the isolation of organs from frog, mouse and rat
- Study of isolated nerves and skeletal muscle to characterize organ physiology
- Determination of blood groups, hemolysis, and coagulation in human blood
- Study of isolated gut, blood vessels, and uterus to characterize the function of smooth muscle
- Practical course on sensory physiology exemplified on the eye
- Study on the circulatory regulation in humans

Qualification-goals/Competencies:

- Acquiring knowledge on experimental procedures in physiology and pharmacology

Grading through:

- presentation and experiments

Requires:

- Physiology (MZ2200-KP06)

Responsible for this module:

- Prof. Dr. med. Cor de Wit

Teacher:

- Institut of Physiology
- Prof. Dr. med. Cor de Wit

Literature:

- : - Lehrbücher der Physiologie

Language:

- offered only in German

LS2805-KP04 - Experimental Biological Chemistry (ExpBiolCh)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each summer semester	4	6

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (optional subject), life sciences, 4th or 6th semester
- Bachelor MLS 2018 (optional subject), life sciences, 4th semester
- Bachelor MLS 2016 (optional subject), life sciences, 4th semester

Classes and lectures:

- Practical course Biological Chemistry (lecture, 2 SWS)
- Practical course Biological Chemistry (exercise, 1 SWS)

Workload:

- 70 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- Recombinant protein synthesis often requires affinity chromatography. This step involves immobilization of a ligand that specifically binds to the protein to be purified. As an example a ligand for human blood group B galactosyltransferase will be synthesized and immobilized.

Qualification-goals/Competencies:

- Simple organic synthesis
- Independent planning of a simple synthesis
- Purification and characterization of synthesis products employing MS and NMR
- Acquisition of skills to work independently and self-determined in the laboratory

Grading through:

- presentation

Requires:

- Organic Chemistry (LS1600-KP04)

Responsible for this module:

- Dr. Alvaro Mallagaray

Teacher:

- Institute of Chemistry and Metabolomics
- Dr. Alvaro Mallagaray

Literature:

- : Scientific publications

Language:

-

Notes:

Scheduling and timing of experiments is up to the students. Therefore, a maximum of six students will be allowed per course.

LS2806-KP04 - Basics of Economics (WPBWL)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each winter- and each summersemester	4	5

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (optional subject), Interdisciplinary modules, 4th to 6th semester
- Bachelor MLS 2016 (optional subject), no specific field, 4th semester
- Bachelor MLS 2018 (optional subject), interdisciplinary competence, 4th and 5th semester

Classes and lectures:

- Basic of economy, spec. personal management (lecture, 2 SWS)
- Basic of economy (exercise, 1 SWS)

Workload:

- 60 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- Basics of economy, spec. personal management

Qualification-goals/Competencies:

- s. Modul EC4001T

Grading through:

- B-Certificate (not graded)

Responsible for this module:

- Dr. rer. nat. Rosemarie Pulz

Teacher:

- Institute for Entrepreneurship and Business Development
- Prof. Dr. Christian Scheiner

Language:

- offered only in German

Notes:

only im WS

LS2807-KP04 - Philosophy of Science (WissTheo)

Duration:	Turnus of offer:	Credit points:
1 Semester	every summer semester	4

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (optional subject), interdisciplinary competence, 4th or 6th semester
- Bachelor Interdisciplinary Courses for health sciences (optional subject), interdisciplinary competence, Arbitrary semester
- Bachelor MLS 2018 (optional subject), life sciences, 4th semester
- Master Interdisciplinary Courses (optional subject), Interdisciplinary modules, Arbitrary semester
- Bachelor Interdisciplinary Courses (optional subject), Interdisciplinary modules, Arbitrary semester
- Bachelor MLS 2016 (optional subject), life sciences, 4th semester

Classes and lectures:

- Basic of evolution theory: Historical and phylosophical perspectives (lecture, 2 SWS)
- Basic of evolution theory: Historical and phylosophical perspectives (seminar, 1 SWS)

Workload:

- 75 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

-
-
-
-
-

Qualification-goals/Competencies:

-
-
-
-

Grading through:

- oral presentation and essay

Responsible for this module:

- Dr. phil. Staffan Müller-Wille

Teacher:

- Institute for History of Medicine and Science Studies

- Dr. phil. Staffan Müller-Wille
- Prof. Dr. med. Cornelius Borck
- Prof. Dr. rer. nat. Burghard Weiss
- Prof. Dr. phil. Christoph Rehmann-Sutter
- Prof. Dr. phil Christina Schües
- Dr. phil. Leonhard Menges
- Dr. rer. nat. Schult

Literature:

- S. Shapin: Die wissenschaftliche Revolution - Frankfurt a.M. 1998
- M. Hagner: Ansichten der Wissenschaftgeschichte - Frankfurt a.M., 2001
- I. Hacking: Einführung in die Philosophie der Naturwissenschaften - Stuttgart 1983
- Rheinberger, Hans-Jörg: Historische Epistemologie zur Einführung - Hamburg 2007
- U. Krohs und G. Toepfer: Philosophie der Biologie: Eine Einführung - Frankfurt a.M. 2005.
- I. Jahn: Grundzüge der Biologiegeschichte - Jena 1990
- K. Köchy: Biophilosophie zur Einführung - Hamburg 2008
- A. Brenner: Leben. Grundwissen Philosophie - Stuttgart 2009

Language:

- offered only in German

Notes:

Part of the module LS2800
Basics understanding of molecular Biology; Interest in philosophical-ethical questions in the life sciences

LS2808-KP04 - Developmental biology in vivo and in vitro (EntwBio)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each summer semester	4	5

Course of study, specific field and term:

- Bachelor Biophysics 2024 (optional subject), life sciences, 6th semester
- Bachelor Molecular Life Science 2024 (optional subject), life sciences, 4th or 6th semester
- Bachelor MLS 2018 (optional subject), life sciences, 4th semester
- Bachelor MLS 2016 (optional subject), life sciences, 4th semester

Classes and lectures:

- Entwicklungsbiologie in vitro und in vivo (seminar / exercises, 3 SWS)

Workload:

- 75 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- Cultivation of adult stem cells
- Differentiation of adult stem cells in vitro
- Characterisation of differentiated cell types by analysing marker gene and protein expression
- Comparison of in vitro cell differentiation with cell differentiation during Ontogenesis

Qualification-goals/Competencies:

- Students are able to list basic priciples of cell differentiation and to explain how to characterize differentiated cells
- Students are able to explain what stem cells are and which differences exist between somatic and embryonic stem cells

Grading through:

- protocols

Responsible for this module:

- Prof. Dr. rer. nat. Charli Kruse

Teacher:

- Institute of Medical and Marine Biotechnology
- Prof. Dr. rer. nat. Charli Kruse

Literature:

- Wolpert: Principles of Development

Language:

- offered only in German

LS2809-KP04 - Special Physics (WPPy)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	normally each term	4	5

Course of study, specific field and term:

- Bachelor MLS 2018 (optional subject), physics, 4th and 5th semester
- Bachelor MLS 2016 (optional subject), Interdisciplinary modules, 4th semester

Classes and lectures:

- Modules of Physics (lecture, 3 SWS)

Workload:

- 70 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- The students choose on lesson in the field of physics of the University of Lübeck with KP04. See details of the choosed modul.

Qualification-goals/Competencies:

- The students choose on lesson in the field of physics of the University of Lübeck. See details of the choosed modul.

Grading through:

- continuous, successful participation in course

Responsible for this module:

- Dr. rer. nat. Rosemarie Pulz

Teacher:

- Institutes of the department of natural science/computer science/engineering
- N.N.

Literature:

- :

Language:

- offered only in German

LS2810-KP04 - Stem Cell Technology (PluStamZel)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each summer semester	4	6

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (optional subject), life sciences, 4th or 6th semester
- Bachelor MLS 2016 (optional subject), life sciences, 4th semester
- Bachelor MLS 2018 (optional subject), life sciences, 4th semester

Classes and lectures:

- Stem Cell Technology Seminar (seminar, 1 SWS)
- Stem Cell Technology Seminar (practical course, 2 SWS)

Workload:

- 75 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- This seminar, offered in the cell culture labs at the Institute of Neurogenetics, provides inside and practical experience of the generation/application of human induced pluripotent stem cells (iPSC):Seminar:
- Basics of stem cell and developmental biology
- Basics of cell culture techniques
- Introduction to the reprogramming of somatic cells into iPSCsBasics of cell culture techniques
- Introduction to the differentiation of stem cells / Application for disease modeling
- Presentation of CRISPR/Cas9 technology as a tool to genome edit iPSCs
- Practical part:
- Cultivation of iPSCs (Freezing, thawing, passaging)
- Characterization of iPSCs by immunostaining and live cell assays
- Plating and immunostaining of cortical iPSC-derived neurons followed by confocal microscopy analysis
- Design of gRNAs for CRISPR knockout, CRISPRa, and CRISPRi
- Presentation of a relevant publication regarding iPSC and CRISPR/Cas9 technologies in form of a 10-minute talk

Qualification-goals/Competencies:

- The students know the basics of cell culture using the example of iPSCs
- They can perform an immunostaining of cells and know how to analyze cellular structures by using confocal microscopy software
- They can describe the basics of the new technologies iPSCs and CRISPR/Cas9

Grading through:

- participation in discussions

Responsible for this module:

- Prof. Dr. Philip Seibler

Teacher:

-

- Prof. Dr. Philip Seibler

Literature:

- :

Language:

- offered only in German

Notes:

without grades

CS1012-KP08, CS1012 - Introduction to Computer Science 1 (EinInfo1)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	8

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (compulsory), mathematics / computer science, 5th semester
- Bachelor MLS 2018 (compulsory), mathematics / computer science, 5th semester
- Bachelor MLS 2016 (compulsory), computer science, 5th semester
- Bachelor MLS 2009 (compulsory), computer science, 5th semester

Classes and lectures:

- Introduction to Computer Science 1 (lecture, 4 SWS)
- Introduction to Computer Science 1 (exercise, 3 SWS)

Workload:

- 135 Hours private studies
- 105 Hours in-classroom work

Contents of teaching:

- Information and data
- Computer hardware
- Computer software
- The concept of algorithms
- Imperative programming
- The Java programming language
- Elementary data structures
- Strings
- Arrays
- Small-scale and large-scale modularization
- Recursion
- Searching and sorting
- Lists
- Trees and search trees
- OO-programming
- Page description languages

Qualification-goals/Competencies:

- Students are able to describe how information processing systems are designed and implemented.
- Furthermore, they can apply IT-systems in research and development projects
- They are able to adapt algorithms and data structures to special-purpose applications.
- They can familiarize themselves easily with new areas of computed science, when lead in advanced courses.

Grading through:

- written exam

Is requisite for:

- Introduction to Computer Science 2 (CS1013)

Responsible for this module:

- Prof. Dr. rer. nat. Till Tantau

Teacher:

- Institute for Theoretical Computer Science
- Prof. Dr. rer. nat. Till Tantau

Literature:

- Heinz-Peter Gumm, Manfred Sommer: Einführung in die Informatik - Oldenbourg Verlag, 6. Auflage, 2006

Language:

- offered only in German

Notes:

Prerequisites for the module:
- nothing

Prerequisites for admission to the written examination:
- succesful participation in the exercises

Module exam:
- CS1012-L1: Introduction into Informatics 1, written exam, 90min, 100% module grade

CS1400-KP04, CS1400 - Introduction to Bioinformatics (EinBioinfo)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	4

Course of study, specific field and term:

- Bachelor IT-Security 2016 (optional subject), interdisciplinary, Arbitrary semester
- Bachelor Nutritional Medicine 2024 (compulsory), mathematics / computer science, 5th semester
- Bachelor Molecular Life Science 2024 (compulsory), mathematics / computer science, 5th semester
- Bachelor MES 2020 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Computer Science 2019 (compulsory), Canonical Specialization Bioinformatics and Systems Biology, 1st semester
- Bachelor Computer Science 2019 (optional subject), Introductory Module Computer Science, 1st semester
- Bachelor MLS 2018 (compulsory), life sciences, 5th semester
- Bachelor MES 2014 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Computer Science 2016 (optional subject), Introductory Module Computer Science, 1st semester
- Bachelor Computer Science 2016 (compulsory), Canonical Specialization Bioinformatics, 1st semester
- Bachelor MLS 2016 (compulsory), life sciences, 5th semester
- Bachelor Medical Informatics 2014 (compulsory), medical computer science, 3rd semester
- Bachelor Computer Science 2014 (compulsory), specialization field bioinformatics, 1st semester
- Bachelor Medical Informatics 2011 (compulsory), medical computer science, 3rd semester
- Bachelor MLS 2009 (compulsory), life sciences, 5th semester
- Bachelor CLS 2010 (compulsory), specialization field bioinformatics, 5th semester
- Bachelor MES 2011 (optional subject), medical engineering science, 3rd or 5th semester
- Bachelor Computer Science 2012 (compulsory), specialization field bioinformatics, 1st semester
- Bachelor Biophysics 2024 (optional subject), computer science, 5th semester

Classes and lectures:

- Introduction to Bioinformatics (lecture, 2 SWS)
- Introduction to Bioinformatics (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Life, Evolution & the Genome
- Sequence assembly - Industrial reading of genetic information
- DNA sequence models & hidden markov models
- Viterbi-Algoritm
- Sequence alignment & dynamic programming
- Unsupervised data analysis (k-means, PCA, ICA)
- DNA microarrays & GeneChip technologies

Qualification-goals/Competencies:

- Students are able to explain the basic concepts of coding, transcription and translation of information in living beings.
- They are able to explain how a solution of the shortest common superstring problem can be estimated with a simple greedy algorithm.
- They are able to create a Markov chain or a Hidden Markov Model (HMM) for a given modelling problem.
- They are able to give examples on how to solve a problem using dynamic programming.
- They are able to implement the introduced algorithms (in Matlab)
- They are able to use unsupervised learning methods and they are able to interpret the results.
- They are able to explain basic Microarray-and DNA-Chip-Technologies.

Grading through:

- portfolio exam

Responsible for this module:

- Prof. Dr. rer. nat. Amir Madany Mamlouk

Teacher:

- Institute for Neuro- and Bioinformatics
- Prof. Dr. rer. nat. Amir Madany Mamlouk

Literature:

- H. Lodish, A. Berk, S. L. Zipursky and J. Darnell: Molekulare Zellbiologie - Spektrum Akademischer Verlag, 4. Auflage, 2001, ISBN-13: 978-3827410771
- A. M. Lesk: Introduction to Bioinformatics - Oxford University Press, 3. Auflage, 2008, ISBN-13: 978-0199208043
- R. Merkl and S. Waack: Bioinformatik Interaktiv: Grundlagen, Algorithmen, Anwendungen - Wiley-VCH Verlag, 2. Auflage, 2009, ISBN-13: 978-3527325948
- M. S. Waterman: Introduction to Computational Biology - Chapman and Hall, 1995

Language:

- offered only in German

Notes:

For students of the master programme Infection Biology, this is not a stand-alone module, but rather part of the module CS4011.

Prerequisites for attending the module:
- None

Computer Science students get a B certificate.

LS3150-KP10 - Molecular Biology (MolBioKP10)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	10

Course of study, specific field and term:

- Bachelor MLS 2018 (compulsory), life sciences, 5th semester
- Bachelor Nutritional Medicine 2018 (compulsory), life sciences, 5th semester
- Bachelor Nutritional Medicine 2016 (compulsory), life sciences, 5th semester
- Bachelor MLS 2016 (compulsory), life sciences, 5th semester

Classes and lectures:

- Molecular Biology (lecture, 2 SWS)
- Molecular Biology (seminar, 2 SWS)
- Practical Course Molecular Biology (practical course, 3 SWS)
- Molecular Biology (exercise, 1 SWS)

Workload:

- 180 Hours private studies
- 120 Hours in-classroom work

Contents of teaching:

- Lectures:Typically, 6 coherent blocks will be lectured.
- Genetic engineering methods: vector types and cloning strategies
- Regulation of eukaryotic gene expression at the DNA level: transcription, RNA polymerases, histone code, and epigenetic processes.
- Nucleic acids: non-coding RNAs, interference RNA, CRISPR-Cas9
- Gene therapy and recombinant vaccines
- Regulation of eukaryotic gene expression at the RNA level; differential splicing of mRNA, molecular basis of the regulation of splicing and mRNA stability as well as significance for human diseases.
- Mechanisms of translation; functions of ribosomal proteins and their paralogs, specialised ribosomes and diseases caused by changes in the translational machinery.
- Exercises:Reading of scientific articles and oral presentation
- Understanding scientific contexts
- English as lingua franca in science
- Practical course (groups of 2): Handling DNA and RNA; isolation, purification, enzymatic cleavage and gel electrophoretic presentation of DNA/RNA fragments.
- Detection of gene expression at the mRNA level, ligation, transformation and selection of clones due to antibiotic resistance.
- Prokaryotic expression of a protein fragment, and its analytical identification and preparative isolation (affinity purification)
- Design of PCR-primers; specialized PCR techniques and identification of PCR products by electrophoresis
- Exercise (groups of 4):Dealing with databases, use of molecular biology computer programs, creation of restriction maps
- Computer-aided sequence analyses

Qualification-goals/Competencies:

- Students are able to present basic steps of genetic engineering
- They can explain basic mechanisms of gene expression
- They are able to formulate basic mechanisms of RNA-regulated biological systems
- They can present examples for the relationship between pathophysiological processes and their molecular basis
- They are able to explain principles of gene therapy
- They acquire the competence to handle english literature and to present it in a scientific oral presentation
- lab course: They have skills in basic molecular-biological techniques
- lab course: They have the basic knowledge of safety at work in molecular-biological labs
- lab course: They know the basics of scientific documentation techniques and can work in a team
- Basic skills to design and perform their own experiments
- Internship: They have basic knowledge of occupational health and safety in molecular biology laboratories
- Internship: They have the ability to document data correctly and work in a team
- They have the basic ability to experiment independently and autonomously
- They will develop additional skills in Digital Molecular Biology.

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Norbert Tautz

Teacher:

- Institute of Medical and Marine Biotechnology
- Department of Neurosurgery
- Institute of Virology and Cell Biology
- Institute of Molecular Medicine

- Dr. rer. nat. Olaf Isken
- Prof. Dr. rer. nat. Norbert Tautz
- PD Dr. rer. nat. Christina Zechel
- Dr. rer. nat. Rosel Kretschmer-Kazemi Far
- Dr. rer. nat. Sandra Schumann

- Lodish et al.: Molecular Cell Biology - Freeman
- Buchanan et al.: Biochemistry and Molecular Biology of Plants - Wiley Verlag
- Watson et al.: Molekularbiologie - Pearson Studium
- : Course script

Language:

- offered only in German

Notes:

Admission requirements for taking the module:
- None

Admission requirements for the practical course:
- Passed module LS2000-KP10 Biochemistry 1 or LS2510-KP10 Biochemistry 2

Admission requirements for participation in module examination(s):
- Successful completion of tests in the practical course during the semester

Module examination(s):
- LS3150-KP10: Molecular Biology, written exam, 90min, 100% of the module grade

(Share of Institute for Virology and Cell Biology in S is 50%)
(Share of Clinic for Neurosurgery in S is 25%)
(Share of Institute for Medical and Marine Biotechnology in S is 25%)
(Share of Institute for Virology and Cell Biology in V is 60%)
(Share of Clinic for Neurosurgery in V is 40%)
(Share of Institute for Virology and Cell Biology in practical course is 100%)
(Share of Institute for Virology and Cell Biology in practise is 100%)

LS3250 A - Part of module LS3250 A: Tissue Engineering (TissEn)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	5

Course of study, specific field and term:

- Bachelor MLS 2018 (Module part of a compulsory module), life sciences, 5th semester
- Bachelor MLS 2016 (Module part of a compulsory module), life sciences, 5th semester
- Bachelor MLS 2009 (Module part of a compulsory module), life sciences, 5th semester

Classes and lectures:

- Tissue Engineering (seminar with practical exercises, 2 SWS)
- Tissue Engineering (lecture, 2 SWS)

Workload:

- 90 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Lectures:Mamalia cells in their natural environment and under in vitro culture as an example of industrial application.
- Aging of cells in vitro
- Established cell lines
- Diverse in vitro culturing conditions
- Proliferation and differentiation under in vitro conditions
- Stem cell biology
- Materials for medical applications
- Fermentors, bioreactors and protein purification
- Home work e. g. Tissue transplantation and rejection
- Practical course (in groups of 2):Principles of aseptic manipulations, working in sterile containments, object and selfprotection, use of autoclaves
- Preparation of sterile media, additives and other reagents
- Slicing of tissue samples, transfer into tissue culture flasks for explant cultures
- Microscopy and documentation of growing cells
- Cell count, passaging by trypsinisation
- Viability test, freezing of cells and reseeding after thawing
- Adherence of cells to various matrices
- Immunohistochemistry of intracellular and extracellular proteins
-
-

Qualification-goals/Competencies:

- Students are able to explain principles of cell- and tissue culture to generate biocomposites from differentiated and pluripotent cells
- They are able to explain basic principles of pro- and eukaryotic gene expression systems
- They are able to explain basic principles of matrix biology
- They can reproduce the aspects of stem cell biology
- They acquire the ability to assess ethical aspects of tissue engineering
- They improve their competence for correct documentation (within regards to the rules of GSP of the UzL) and team working skills
-

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Charli Kruse

Teacher:

-
- Department of Dermatology, Allergology and Venerology
- Institute of Virology and Cell Biology
- Institute of Medical and Marine Biotechnology

- Prof. Dr. rer. nat. Charli Kruse
- Dr. rer. nat. Daniel Hans Rapoport

- Dr. rer. nat. Philipp Ciba
- Prof. Dr. rer. nat. Markus Hoffmann, Dr. med.
- Prof. Dr. med. vet. Jennifer Hundt
- Prof. Dr. med. Ralf Ludwig
- Dr. rer. nat. Olaf Isken
- Dr. med. Dipl. Biol. Judith Sewing

Literature:

- Lanza, Langer, Vacanti: Principles of Tissue Engineering

Language:

- offered only in German

Notes:

Knowledge in Cell biology is a prerequisite for this course. Entrance requirement for the seminar with practical parts: certificate of the course Biochemistry 1 or 2 (LS2000-KP10 or LS2510-KP10), practical Cell Biology (LS2700-P).

See module LS3250-KP05

(Is part of LS3250)

(Share of Marine Biotechnology in V is 43%)
(Share of Virology in V is 29%)
(Share of Dermatology in V is 21%)
(Share of Ophthalmology in V is 7%)
(Share of Virology in S is 100%)

LS3250 B - Module part LS3250 B: Metabolic Medicine (Metabol)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	5

Course of study, specific field and term:

- Bachelor MLS 2018 (Module part of a compulsory module), life sciences, 5th semester
- Bachelor MLS 2016 (Module part of a compulsory module), life sciences, 5th semester
- Bachelor MLS 2009 (Module part of a compulsory module), life sciences, 5th semester

Classes and lectures:

- Metabolic Medicine (lecture, 2 SWS)
- Tissue Engineering (seminar with practical exercises, 2 SWS)

Workload:

- 90 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Metabolic physiology
- glucose metabolism & diabetes
- lipid metabolism & obesity, adipokines
- gastroenterology
- thyroid
- central appetite regulation
- circadian clocks & metabolism
- sleep & metabolism
- Seminar TE: see LS3250-KP05

Qualification-goals/Competencies:

- Understanding the principles of energy homeostasis
- Understanding physiological interactions of different compartments in the context of energy metabolism
- Students know the symptoms of major metabolic disorders and their pathophysiological causes

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Henrik Oster

Teacher:

- Institute for Endocrinology and Diabetes
- Institute of Neurobiology
- Medical Clinic I

- Prof. Dr. rer. nat. Henrik Oster
- Dr. rer. nat. Carla Schulz
- Prof. Dr. rer. nat. Jens Mittag
- Dr. rer. nat. Violetta Pilorz
- Dr. rer. nat. Isabel Heyde
- Dr. rer. nat. Rebecca Ölkrug
- PD Dr. Britta Wilms

Literature:

- Keith N. Frayn: Metabolic Regulation: A Human Perspective - Wiley & Blackwell, 2010

Language:

- German and English skills required

Notes:

Prerequisites for the module:
- LS2000-L1 Biochemstry 1 or LS2510-L1 Biochemstry 2
- LS2700-P Practical Cell Biology (for practical parts of LS3251-S)

Prerequisites for admission to the written examination:
- succesful participation in the seminar LS3250-S Tissue Engineering

Module exam:
- LS3252-L1:Metabolic Medicin, written exam, 90 min, 100 % module grade

Principle knowldege in physiology and biochemistry required.

LS3250-KP05, LS3250 - Applied MLS (AngMLS)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	5

Course of study, specific field and term:

- Bachelor MLS 2018 (optional subject), life sciences, 5th semester
- Bachelor MLS 2016 (compulsory), life sciences, 5th semester
- Bachelor MLS 2009 (compulsory), life sciences, 5th semester

Classes and lectures:

- Tissue Engineering (seminar with practical exercises, 2 SWS)
- See LS3250 A: Tissue Engineering (lecture, 2 SWS)
- See LS3250 B: Metabolic Medicine (lecture, 2 SWS)

Workload:

- 90 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Lecture: see LS3250-A and LS3250-B

Qualification-goals/Competencies:

- see LS3250-A and LS3250-B

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Charli Kruse

Teacher:

-
- Institute of Neurobiology
- Medical Clinic I
- Institute of Medical and Marine Biotechnology
- Institute for Endocrinology and Diabetes
- Department of Dermatology, Allergology and Venerology
- Institute of Virology and Cell Biology

- Prof. Dr. rer. nat. Charli Kruse
- Prof. Dr. rer. nat. Henrik Oster
- Dr. rer. nat. Daniel Hans Rapoport
- Dr. rer. nat. Philipp Ciba
- Prof. Dr. rer. nat. Markus Hoffmann, Dr. med.
- Prof. Dr. med. vet. Jennifer Hundt
- Prof. Dr. med. Ralf Ludwig
- Dr. rer. nat. Olaf Isken
- Dr. med. Dipl. Biol. Judith Sewing

Language:

- offered only in German

Notes:

Admission requirements for taking the module:
- LS200-L1 Biochemistry 1 oder LS2510-L1 Biochemistry 2
- LS2700-P Practical Cell Biology (for practical parts of LS3251-S)

Admission requirements for participation in module examination(s):
- succesful participation in the seminar TE

Module exam(s):
- LS3251-L1: Tissue Engineering (LS3250 A) resp. Metabolic Medicine (LS3250 B), written exam per Field of specialisatoin 60 min, 100 % of the module grade

Knowledge of cell biology is a prerequisite.

One of the lectures LS3250 A or B must be chosen, the seminar TE is compulsory.

Compulsory registration is required for the written examination, where the date and elective subject will be determined.

(Consists of LS3250 A, LS3250 B)
(Choose 1 from all)

MZ3000-KP06, MZ3000 - Microbiology (MikroBio)

Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	6

Course of study, specific field and term:

- Bachelor MLS 2016 (compulsory), life sciences, 5th semester
- Bachelor MLS 2009 (compulsory), life sciences, 5th semester

Classes and lectures:

- Microbiology (lecture, 2 SWS)
- Microbiology (practical course, 2 SWS)

Workload:

- 120 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Systematics of microorganisms
-
- Bacterial cell wall
- Bacterial growth
- Bacterial toxins
-
- Medical microbiology
-
- Immunology
- Decomposition of natural substances
- Industrial microbiology
- Practical course: General bacteriology, bacteriological techniques
- Differentiation of bacteria
- Bacterial growth and how we can inhibit it
- Biochemistry

Qualification-goals/Competencies:

- Studying major groups of microorganisms, understanding of basic microbiological concepts
- Learning of basic microbiological lab techniques
- Studying major infectious diseases and the causative organisms
- Studying basic mechanisms of the immune response
- Acquiring basic knowledge of safety at work by handling with microorganisms
- Improving the ability of scientific documentation techniques, presentation of data and working in a team
- Basic skills to design and perform their own experiments

Grading through:

- written exam

Requires:

- Biology 1 (LS1000-MLS)

Responsible for this module:

- Prof. Dr. med. Jan Rupp

Teacher:

- Research Center Borstel, Leibniz Lung Center
- Department of Infectious Diseases and Microbiology

- Prof. Dr. med. Jan Rupp
- Prof. Dr. rer. nat. Stefan Niemann
- Dr. Katarzyna Duda
- Dr. med. Susanne Hauswaldt
- Dr. rer. nat. Simon Graspeuntner
- Dr. rer. nat. Dirk Friedrich
- Prof. Dr. med. Dennis Nurjadi

- Prof. Dr. rer. nat. Matthias Merker
- Prof. Dr. med. Tanja Lange
- PD Dr. med. Thomas Bollinger
- Dr. rer. nat. Tobias Dallenga

Literature:

- Michael T. Madigan, u. a. (2020): Brock Mikrobiologie - Pearson Studium 15. Auflage

Language:

- offered only in German

CS1020-KP05 - Introduction Into Databases and Systems Biology (EinfDBSB)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	5

Course of study, specific field and term:

- Bachelor Biophysics 2024 (compulsory), bioinformatics, 6th semester
- Bachelor Nutritional Medicine 2024 (compulsory), life sciences, 6th semester
- Bachelor Molecular Life Science 2024 (compulsory), life sciences, 6th semester
- Bachelor MLS 2018 (compulsory), computer science, 6th semester
- Bachelor Nutritional Medicine 2018 (compulsory), computer science, 6th semester
- Bachelor MLS 2016 (compulsory), computer science, 6th semester
- Bachelor Biophysics 2016 (compulsory), bioinformatics, 6th semester
- Bachelor Nutritional Medicine 2016 (compulsory), computer science, 6th semester

Classes and lectures:

- Introduction into databases and system biology (lecture, 2 SWS)
- Introduction into databases and system biology (exercise, 1 SWS)
- Introduction into databases and system biology (practical course, 1 SWS)

Workload:

- 75 Hours private studies
- 45 Hours in-classroom work
- 30 Hours exam preparation

Contents of teaching:

- Entity-Relationship-Models
- Relation algebras
- Database systems
- Structured query language
- bio-databases
- Basic terms of system biology
- Cellular networks

Qualification-goals/Competencies:

- Students can create databases, manage them and create complex database queries.
- They can explain the basic terms of system biology and classify them correctly.
- Students know different bio-databases and can use and access them to solve problems from bioinformatics and system biology.

Grading through:

- written exam

Responsible for this module:

- Prof. Dr. rer. nat. Till Tantau

Teacher:

- LIED | Lübecker Institut für experimentelle Dermatologie (Lübeck Institute of Experimental Dermatology)
- Institute for Theoretical Computer Science

- Prof. Dr. rer. nat. Till Tantau
- Prof. Dr. Hauke Busch

- Gumm, Sommer: Einführung in die Informatik - 2012, De Gruyter Studium Kemper
- Kemper, Eickler: Datenbanksysteme: Eine Einführung - 2015, De Gruyter Studium

Language:

- offered only in German

Notes:

Prerequisites for the module:
- nothing

Prerequisites for admission to the written examination:
- succesful work on the exercises

Module exam:
- CS1020-L1: Introduction into databases and system biology, written exam, 90 min, 100 % module grade

LS3500-KP05, LS3500 - Introduction into Structural Analysis (EinStruA05)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	5

Course of study, specific field and term:

- Bachelor Biophysics 2024 (compulsory), life sciences, 6th semester
- Bachelor Molecular Life Science 2024 (compulsory), life sciences, 6th semester
- Bachelor MLS 2018 (compulsory), life sciences, 6th semester
- Bachelor Biophysics 2016 (compulsory), life sciences, 6th semester
- Bachelor MLS 2016 (compulsory), life sciences, 6th semester

Classes and lectures:

- Introduction into Structural Analysis (lecture, 2 SWS)
- Introduction into Structural Analysis (seminar / exercises, 2 SWS)

Workload:

- 90 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Part A: Protein structure analysis by crystal X-ray diffraction:
- Crystal growth: precipitant and phasediagram
- Crystal morphology: symmetry and space groups
- X-ray diffraction: Bragg's law, reciprocal lattice and the Ewald-sphere construction
- Phase determination: Patterson map and molecular replacement
- Part B: Basic NMR spectroscopy for the investigation of biomolecular structures: Basics of NMR spectroscopy: NMR experiments, Spin systems, the classical vector model
- The nuclear Overhauser effect
- Identification and characterisation of protein-ligand interactions: The transfer nOe, the STD-NMR-experiment, the HSQC experiment, the cross-saturation experiment
- Building blocks for NMR experiments
- Part C: Basics of mass spectrometry:Indroduction and basics
- Ion sources and their fields of application
- Mass analysers
- Structural analysis of biomolecules

Qualification-goals/Competencies:

- The students will acquire basic skills in selected biophysical techniques to analyze the structure and dynamics of biological macromolecules. The emphasis is on understanding the concepts behind these techniques.
- Furthermore, the students will learn how to elucidate the structure of small organic molecules
-

Grading through:

- written exam

Responsible for this module:

- Dr. Alvaro Mallagaray

Teacher:

- Research Center Borstel, Leibniz Lung Center
- Institute of Biochemistry
- Institute of Chemistry and Metabolomics

- Prof. Dr. Thomas Krey
- Dr. math. et dis. nat. Jeroen Mesters
- Dr. Alvaro Mallagaray
- Dr. Dominik Schwudke

Literature:

- actual papers:
- Teil B: Horst Friebolin: Ein- und zweidimensionale NMR-Spektroskopie. Eine Einführung - Wiley-VCH

- Alexander Mc Pherson: Introduction to Macromolecular Crystallography - 1st edition, 2003, Wiley

Language:

- offered only in German

Notes:

Prerequisites for the module:
- nothing

Prerequisites for admission to the written examination:
- nothing

Module exam:
- LS3500-L1: Introduction into Structural Analysis, written exam, 90 min, 100 % module grade

LS3990-KP12, LS3990 - Bachelor Thesis (BScArbeit)

Duration:	Turnus of offer:	Credit points:
1 Semester	each semester	12

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (compulsory), interdisciplinary, 6th semester
- Bachelor MLS 2018 (compulsory), life sciences, 6th semester
- Bachelor MLS 2016 (compulsory), life sciences, 6th semester
- Bachelor MLS 2009 (compulsory), life sciences, 6th semester

Classes and lectures:

- Practical work (practical course, 2 SWS)
- Authoring of the Bachelor Thesis (autonomous practical studies , 1 SWS)
- Colloquium (presentation (incl. preparation), 1 SWS)

Workload:

- 360 Hours in-classroom work

Contents of teaching:

- Research in the range of molecular biosciences

Qualification-goals/Competencies:

- Ability to solve a preformulated simpel scientific problem mostly independent in a defined period of time and to present and defende the experimental results with regardto the roles of Good Scientific Practice (GSP) of the University of Lübeck and of the DFG-guidelines.
- Basic skills to design and perform their own experiments

Grading through:

- written exam, oral presentation, and defence of the experiment´s results

Responsible for this module:

- Studiengangsleitung MLS

Teacher:

- Institutes of natural science
- Alle prüfungsberechtigten Dozentinnen/Dozenten des Studienganges

Literature:

- Topical literature about the subject: - will be announced by the lecturer

Language:

- thesis can be written in German or English

Notes:

Prerequisites for the module:
- Minimum of 120 ECTS

Prerequisites for admission to the written examination:
- succesful work on a topic of MLS

Module exam:
- LS3990-L1: Bachelor Thesis MLS, written documentation of the practical work of an MLS topic and colloquium, 60 min, 100 % module grade

If the Bachelor Thesis is done externally (outside our university) the student has to choose a licensed lecturer (see PO) of our university as a second instructor who will be first Examiner in the examination.

Thesis must be written in German. Exception: if the examinator is an English nativ speaker.

MA1600-KP04, MA1600, MA1600-MML - Biostatistics 1 (BioStat1)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	4

Course of study, specific field and term:

- Bachelor CLS 2023 (compulsory), mathematics, 2nd semester
- Bachelor Biophysics 2024 (compulsory), Elective Computer Science, 4th semester
- Bachelor Nutritional Medicine 2024 (compulsory), mathematics / natural sciences, 4th semester
- Bachelor MES 2014 (optional subject), mathematics / natural sciences, 3rd semester at the earliest
- Bachelor Computer Science 2019 (optional subject), Extended optional subjects, Arbitrary semester
- Bachelor Computer Science 2019 (compulsory), Canonical Specialization Bioinformatics and Systems Biology, 6th semester
- Bachelor Medical Informatics 2019 (compulsory), medical computer science, 6th semester
- Bachelor MLS 2018 (compulsory), life sciences, 6th semester
- Bachelor Nutritional Medicine 2018 (compulsory), mathematics / computer science, 6th semester
- Bachelor CLS 2016 (compulsory), mathematics, 2nd semester
- Bachelor CLS 2010 (compulsory), mathematics, 2nd semester
- Bachelor Computer Science 2016 (optional subject), advanced curriculum, Arbitrary semester
- Bachelor Computer Science 2016 (compulsory), Canonical Specialization Bioinformatics, 4th semester
- Bachelor MLS 2016 (compulsory), life sciences, 6th semester
- Bachelor Biophysics 2016 (compulsory), Elective Computer Science, 4th semester
- Bachelor Nutritional Medicine 2016 (compulsory), mathematics / computer science, 6th semester
- Bachelor Medical Informatics 2014 (compulsory), medical computer science, 4th semester
- Bachelor Computer Science 2014 (compulsory), specialization field bioinformatics, 6th semester
- Master MES 2011 (advanced curriculum), biophysics and biomedical optics, 2nd semester
- Bachelor Medical Informatics 2011 (compulsory), medical computer science, 4th semester
- Master Computer Science 2012 (optional subject), specialization field bioinformatics, 2nd or 3rd semester
- Master Computer Science 2012 (compulsory), advanced curriculum stochastics, 2nd semester
- Bachelor Computer Science 2012 (optional subject), specialization field bioinformatics, 6th semester
- Bachelor MLS 2009 (compulsory), life sciences, 6th semester
- Bachelor MES 2011 (optional subject), medical engineering science, 6th semester
- Bachelor Molecular Life Science 2024 (compulsory), mathematics / computer science, 4th semester

Classes and lectures:

- Biostatistics 1 (lecture, 2 SWS)
- Biostatistics 1 (exercise, 1 SWS)

Workload:

- 66 Hours private studies
- 39 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

- Descriptive statistics
- Probability theory, including random variables, density, and cumulative distribution function
- Normal distribution, other distributions
- Diagnostic tests, reference range, normal range, coefficient of variation
- Statistical testing
- Sample size calculations
- Confidence intervals
- Selected statistical tests I
- Selected statistical tests II
- Linear simple regression
- Analysis of variance (one-way-classification)
- Clinical trials
- Multiple Testing: Bonferroni, Bonferroni-Holm, Bonferroni-Holm-Shaffer, Wiens, hierarchical Testing

Qualification-goals/Competencies:

- With regard to the roles of GSP of the University of Lübeck and of the DFG-guidelines the student were able to work with the following statistical methods:The students are able to calculate descriptive statistics.
- They are able to calculate quantiles and surfaces of the normal distribution.
- They are able to explain terms of diagnostic testing, such as sensitivity or specificity.
- They are able to list the basic principles of statistical testing, sample size calculation and confidence interval construction.

- They are able to carry out a set of elementary statistical tests, such as t-test, test of proportions, X2 independence test, and to interpret the results.
- They are able to explain the basic principles of linear regression.
- They are able to apply the linear simple regression.
- They are able to explain the basic idea for the one-way analysis of variance (ANOVA).
- They are able to explain the results table for the one-way and two-way ANOVA.
- They are able to interpret the results of the ANOVA.
- They know the basic principles of clinical therapeutic studies.
- They know the assumptions that need to be fulfilled for the application of specific statistical tests.
- They are able to calculate simple adjustments for multiple comparisons.

Grading through:

- written exam

Is requisite for:

- Module part: Biostatistics 2 (MA2600 T)
- Biostatistics 2 (MA2600-KP07)
- Biostatistics 2 (MA2600-KP04, MA2600)

Responsible for this module:

- Prof. Dr. rer. biol. hum. Inke König

Teacher:

- Institute of Medical Biometry and Statistics

- Prof. Dr. rer. biol. hum. Inke König
- MitarbeiterInnen des Instituts

Literature:

- Matthias Rudolf, Wiltrud Kuhlisch: Biostatistik: Eine Einführung für Biowissenschaftler - 1. Auflage, Pearson: Deutschland
- Lothar Sachs, Jürgen Hedderich: Angewandte Statistik: Methodensammlung mit R - 15. Auflage, Springer: Heidelberg

Language:

- offered only in German

Notes:

Prerequisites for attending the module:
- None

Prerequisites for the exam:
- Active and regular participation in the exercise groups as specified at the beginning of the semester.

Module exam:
-MA1600-L1: Biostatistics 1, written exam, 90 min, 100 % of module grade

PS1030-KP04, PS1030 - English for Bachelor and Master students MLS (Engl)

Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	4

Course of study, specific field and term:

- Bachelor Molecular Life Science 2024 (optional subject), interdisciplinary competence, Arbitrary semester
- Master MES 2020 (optional subject), interdisciplinary, Arbitrary semester
- Bachelor MES 2020 (optional subject), interdisciplinary, Arbitrary semester
- Bachelor MLS 2018 (optional subject), interdisciplinary competence, Arbitrary semester
- Bachelor MLS 2016 (optional suject), interdisciplinary competence, Arbitrary semester
- Bachelor Biophysics 2016 (optional subject), no specific field, 6th semester
- Master MES 2014 (optional subject), no specific field, 2nd semester
- Bachelor MES 2014 (optional subject), no specific field, 4th or 6th semester
- Master MLS 2009 (optional subject), interdisciplinary competence, Arbitrary semester
- Bachelor MES 2011 (optional subject), medical engineering science, Arbitrary semester
- Master CLS 2010 (optional subject), interdisciplinary competence, Arbitrary semester
- Bachelor MLS 2009 (optional subject), interdisciplinary competence, Arbitrary semester

Classes and lectures:

- English for Bachelor and Master students MLS (exercise, 4 SWS)

Workload:

- 60 Hours private studies
- 60 Hours in-classroom work

Contents of teaching:

- Exercise:The content follows a curriculum, modified depending on the given skills and the thematic interests of the participants.
- Creating a CV in English

Qualification-goals/Competencies:

- Students acquire basic knowledge of the English language in word and writing.
- They improve their communication in English.
- They improve their skills in reading and writing English texts, including specialist literature.

Grading through:

- written exam

Responsible for this module:

- B. Sc. Sara Meitner

Teacher:

-

- B. Sc. Sara Meitner

Literature:

- : - Up-to-date publications and articles

Language:

- offered only in English

Notes:

Prerequisites for attending the module:
- None

Prerequisites for the exam:
- Preliminary examinations can be determined at the beginning of the semester. If preliminary work has been defined, it must have been completed and positively assessed before the initial examination.
